

# Easy Street Draw

The Easiest Accident Diagramming Software on the Market

Easy Street Draw is the most widely deployed crash diagramming software of its kind, used by more than 300,000 police officers worldwide. Easy, fast, and accurate, it saves officers and agencies time and money

## Easy Street Draw Benefits

Cost Effective

Save Time

Easy to Learn and Use

Expansive Symbol Library

Mobile Deployment Options

Digital Evidence

Flexible Exports

Multiple Languages

GIS Integration

## Easy Street Draw Options

If you're interested in SmartSafety Software's Easy Street Draw product, you'll notice there are three different options for purchase – Desktop, Editor, and Web.

### Desktop

Think of our Desktop version like a Microsoft Office product – it is an app installed on your PC. You use our Desktop version to create diagram-centric documents that can be saved as files, printed, or exported in other formats like images and PDFs. Integration with your RMS or Crash Reporting System may be limited and require you to manually upload the exported drawings into your system.

### Editor

The Diagram Editor is used primarily with RMS applications that are installed on individual workstations. It is designed for integration into products that are developed using .Net or COM. This means that your RMS provider is in control of how and when the diagram editing tool is viewed and used and it can be embedded into your RMS or Crash Reporting System workflow.

### Web SDK

Web SDK looks like Editor, but it is never installed on an end-user's laptop or workstation. This option is installed on the server that hosts the web-based RMS or Crash Reporting System. It is designed to be embedded in a browser-based application, like an RMS that is accessed via a web browser. You can also embed the diagramming process into your RMS or Crash Reporting System workflow.

## Easy Street Draw Specs

**Processor** Intel Core i5 or better processor  
**Memory** 8 GB RAM or more (16 GB recommended)  
**Hard Disk** Approximately 2.0 GB for software installation

**Display**  
**Operating System**

1920 x 1080 or higher resolution monitor  
Windows 10/11, 64-bit  
Windows Server 2016 or greater
